

Submission & Leaderboard Clarification

Although our team "kadirdaglar" achieved a public leaderboard score of 0.73333, ranking 15th globally, our team name does not appear on the leaderboard. The reason is that our final submission was made after the official competition deadline, and thus classified as a late submission.

Unfortunately, Kaggle's rules regarding leaderboard inclusion for late submissions were not explicitly mentioned in the competition description, and our team was unaware that such submissions would not be publicly listed. Upon noticing the issue, we contacted the Kaggle Support Team, who clarified that submissions made after the deadline cannot be considered in the final leaderboard, even if they were valid and scored.

Moreover, we attempted to reach out to the competition host/organizer through the discussion board and direct messages but did not receive a response. Since this project is part of an official university course (EEE406 – Fundamentals of Biomedical Signal Processing), leaderboard visibility is important for our academic evaluation. We respectfully request that our result (score and rank) be considered valid in academic contexts, even though it does not appear on the official leaderboard.

We hope this explanation provides sufficient clarity regarding our performance and submission status.

Hello Suat,

Thank you for your inquiry. We apologize for the inconvenience. If the submission is made after the deadline we cannot consider that in the leaderboard.

Thank you for your response.

We would like to clarify that our team, kadirdaglar, was not removed due to a compliance violation, but rather because our final submission was made as a late submission, slightly after the deadline.

We fully understand and respect the rules regarding late submissions. However, our participation in this competition is part of a graded university course project (EEE406 – Fundamentals of Biomedical Signal Processing), and being listed on the leaderboard is essential for our academic evaluation.

Therefore, we kindly ask if it is possible to include our team on the leaderboard — even unofficially or with an annotation — solely for academic confirmation purposes.

We greatly appreciate your time and understanding.

Best regards,
Suat Deniz
